

## Cycles of Time: An Extraordinary New View of the Universe

By Rouse Ball Professor of Mathematics Roger Penrose

Random House USA Inc, United States, 2012. Paperback. Book Condition: New. Reprint. 201 x 132 mm. Language: English . Brand New Book. This groundbreaking book presents a new perspective on three of cosmology's essential questions: What came before the Big Bang? What is the source of order in our universe? And what cosmic future awaits us? Penrose shows how the expected fate of our ever-accelerating and expanding universe--heat death or ultimate entropy--can actually be reinterpreted as the conditions that will begin a new Big Bang. He details the basic principles beneath our universe, explaining various standard and non-standard cosmological models, the fundamental role of the cosmic microwave background, the paramount significance of black holes, and other basic building blocks of contemporary physics. Intellectually thrilling and widely accessible, *Cycles of Time* is a welcome new contribution to our understanding of the universe from one of our greatest mathematicians and thinkers.
