He describes the make-up of words and how they're built from sounds and signs and put together in phrases and sentences. He examines the dynamics of conversation and the relations between the sound and meaning. He shows how languages help their users connect to each other and to the world, how they vary around the world, why they never stop changing, and that no two people speak a language in the same way. He looks at how language is acquired by infant children, how it relates to thought, and its operations in the brain. He investigates current trends and issues such as the levelling of linguistic class differences and the rise of new secret or in-group languages such as argot and teenspeak. He describes the history of writing from its origins to digital diffusion, and ends by looking at how language might have originated and then evolved among our distant hominid and primate ancestors. Language is crucial to every aspect of our lives whether we're thinking, talking, or...
