SURVIVAL FIRE

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The ability to make a fire for warmth in cool and wet environments is critical for survival. Without fire you may die within a few hours. I have spent my life living and playing in the Pacific Northwest in the United States. In my neck of the woods, challenges of staying alive and avoiding hypothermia are constant. Except for a few warm and dry weeks in the summer; anybody outdoors is generally just a few hours from dying if they are wet. The remedy for this constant threat is: to stay dry, dress correctly and know how to instantly start and maintain a small fire. Fire means life in a survival situation. This book presupposes that you know the basics of how to start a fire under normal conditions. If you haven't done this very often, I suggest that you research the topic and practice starting a fire in a fireplace without anything except: paper, matches, kindling and fire wood. Practice until you can do it instantly and reliably. It is a lot harder than you think. Check out any Boy Scout manual if you need some tips or directions. Don't be embarrassed. Modern first world dwellers almost never have basic wilderness skills.
